

Adam Hardie

Technical Consultant

MSc Sustainable Business: Leadership, Innovation and Management

BSc (Hons) Geography

Role

Adam joined Pager Power as a Technical Consultant in 2025, with his primary role being to assist developers in assessing, managing and overcoming technical planning issues for wind, solar and building projects related to aviation, telecommunications and more. A key part of Adam's role is liaising with planning authorities and stakeholders to ensure a positive way forward for his projects.

Experience

Assessed the potential impact of glint and glare in the context of aviation activity, road safety and residential amenity in the UK and internationally.

Undertaken desk-based analysis to determine areas of potential television reception interference due to wind turbines in Wales.

Identified potential aviation OLS risks for onshore wind developments in the UK.

Undertaken desk-based analysis for the impact of tall buildings upon aviation radar systems in central Manchester.

Represented Pager Power at a variety of planning and stakeholder meetings.

Undertaken field surveys pertaining to terrestrial television quality for large building developments in Birmingham and Wales.

Undertaken Daylight and Sunlight assessments for new-build projects and residential extensions.

Undertaken technical assessments covering a range of topics, including:

- Aviation Safeguarding
- Daylight, Sunlight and Overshadowing
- Glint and Glare (Solar reflections)
- Technical Mitigation
- Television and Radio Reception
- Telecommunication Impacts
